U.S. Slaps Cover On Radiation Work

By RAY WIELAND
(News Staff Writer)

A tight "top secret" security lid slammed down during Christmas on research being done in Ft. Lauderdale by two top scientists on a chemical

which they believe will prevent radiation sickness, dread side-product of the atomic age.

Dr. Alexander Farkas, 70, North Miami Beach, noted biochemist, confirmed receiving an "official" call from a governmental agency in New York cautioning against possible disclosure of secrets of the chemical.

Dr. Floyd M. Mizell, 45, Ft. Lauderdale nuclear physicist and chemist working with Dr. Farkas, said all work papers and research data relating to the chemical have been put under maximum locked security by him.

Preliminary success by the two scientists in preventing and reducing effects of atomic radiation in work with rats, and plans for further research on rats, swine, goats and humans were disclosed in The News and Sun-Sentinel Dec. 22.

It was learned in Washington today that the FBI and Central Intelligence Agency (CIA) are "aware" of the Mizell-Farkas work. The Atomic Energy Commission has under contract a number of people who are doing similar work on a wholesale
